

FIG 1 – REACTIVE MOVING OBJECTS - SPACE

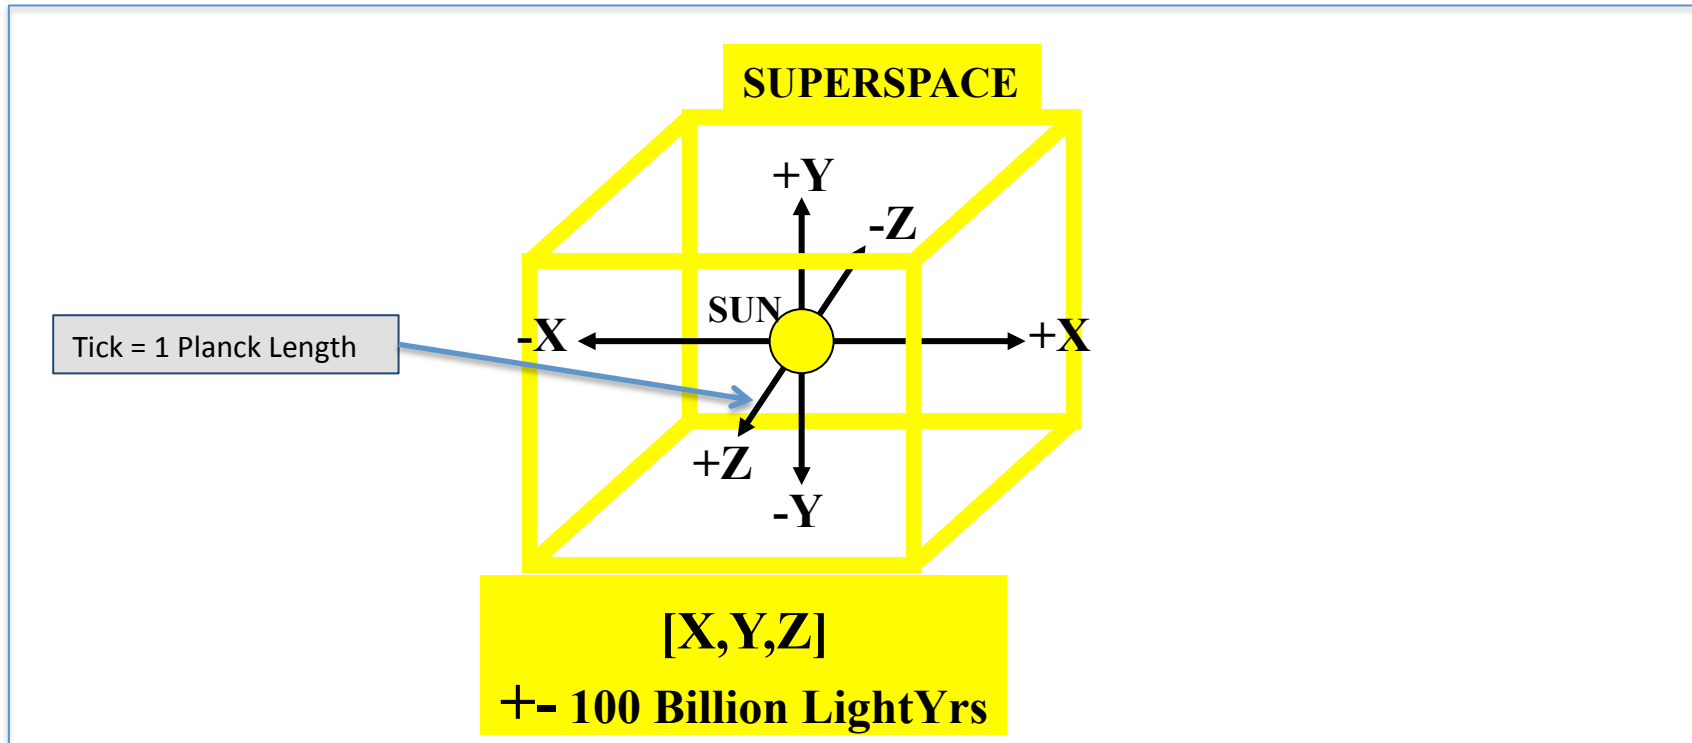

FIG.00001 – “SAGOE’s Unifying Principal - Reactive Moving Objects – (**SPACE**)”. SAGOE must have a framework that provides a standard coordinate system for the concept of Space that encompasses all possible spatial coordinates past, present, and future. One way to accomplish this, the SAGOE standard system (referred to as *SuperSpace*), is 3D [X,Y,Z] 100 Billion Light Years extending in every 90 degree direction from our Sun in intervals as small as 1 Planck Length (1.62×10^{-35} m).
